

American Beach Grass is Taking Root and Protecting Sensitive Environmental Areas

VTC Environmental Institute

Taking Action

2021 Summer Report

...how things looked months ago

...how things looked days ago

During the 2021 Come to the Bay Conference, the VTC Environmental Institute provided and planted 6,000 American Beach Grass plants at the Virginia Beach oceanfront. This important project was possible because of (1) leadership provided by Michael Moore and other city officials and (2) the generous financial support and labor provided by Lawns and Gardens Plus.

Next year we intend to double our efforts by providing and planting 12,000 American Beach Grass plants
